Three Technologies, One Device

Roboderm® Microstimulation

Patented deep-tissue stimulation that reactivates microcirculation and promotes cell renewal. Painless, with zero recovery time.

650nm LED Light

Photodynamic technology that stimulates collagen and elastin production, improving skin firmness and radiance.

ICO-ONE Skin Care

Cutting-edge cosmetics tailor-made for microstimulation. Professional cabin line plus home care to extend treatment benefits.

8 Targeted Treatment Actions

22 Pre-Set Protocols for Customized Treatments

EXFOLIANT

Removes dead cells,
stimulates microcirculation
for brighter, radiant skin

LIFTING

Redefines facial contours,
reduces signs of aging on
delicate areas

FIRMING

Improves skin elasticity for
firmer, more toned skin

DEFATIGUING

Eliminates liquids,
revitalises the face for a
fresher appearance

REMODELLING

Redefines volumes and
harmonises facial features

INVIGORATING

Promotes cell regeneration,
reduces skin laxity

ILLUMINATING

Gives shine and tone,
promoting skin rejuvenation

PLUMPING

Facilitates collagen and
elastin production,
reduces wrinkles
