Micro Actions Macro Changes

icoone®

See and feel the difference of icoone® microstimulations

icoone® is the innovative, **natural, non-invasive** facial and body treatment device that delivers rapid, unbeatable results.

Based on several scientific studies, icoone® features **the world's most innovative patented skin care technology** called **Roboderm®**.

Roboderm® is a new concept in skin treatment technology that works unlike any other technology or device on the market today thanks to its **microstimulation**.

→ **86%**

of the total surface of the microstimulator is covered by the microholes which are responsible for active stimulation.

In fact, icoone® induces **up to 21,600 microstimulations every minute** on the skin, enabling it to provide the best, most effective action on all skin types.

Face, around the eyes, neck, arms, body: there are no limits to its application.

icoone® is the perfect, 100% natural solution for even the most delicate or sensitive skin, and it has no side effects!

Customized treatments for unbeatable results

The icoone® experience is **totally customizable** and it can be tailored to meet specific goals and satisfy individual needs and preferences.

DAILY USE
