## How Anna Zahn Of Ricari Studios Is Revolutionizing The Self-Care Industry

The Italian word *ricari* directly translates to *recharge*, or to *bring energy back to something*. That is precisely the reason why Anna Zahn opened **Ricari Studios** almost a decade ago, specializing in lymphatic drainage treatments. Zahn wanted to fill what she felt was a gap in spa culture. “I always wanted to encourage a movement in beauty and self-care culture to liberate it from the outdated, negative connotations, like vanity, privilege and narcissism,” says Zahn. The Ricari experience is indulgent, to be sure, but don’t our bodies deserve that? Why is *indulgence* suddenly a bad thing? When the physical, mental and emotional health benefits are boundless, shouldn’t self-care be high up on our list of values?

Our treatments are primarily centered around the Italian made **ICOONE device**. Rollers deliver inward, outward, forward and backward rotations providing fractionated skin stimulation customized to our clients needs. It gently yet intensively conditions skin tissue to reduce cellular deposits, enhance blood and lymphatic flow and reactivate lipolysis. Rhythmic vibrations also stimulate collagen and elastin production to rapidly smooth and firm the skin. Unlike other techniques, the treatment is painless, incredibly customizable, and deeply effective. The fundamentals of the techniques we use have been around for centuries, but in some ways have managed to get lost or forgotten in the evolution of wellness. The technology we have today is empowering a sort of renaissance of this ancient knowledge, augmenting its potential and refinement of its application through technological innovation.

## СОТВОРЕНИЕ

Самый известный в мире аппарат для моделирования фигуры icoone обновлен до версии LASER MED. Украина – первая страна, где его стали использовать

Все не то, чем кажется, – к такому выводу пришел профессор, специалист по реконструктивной хирургии Жан-Клод Гимберто, когда исследовал строение соединительной ткани. Минимальная выемка, введенная под кожу, показала: та представляет собой не просто «слоеный пирог» из эпидермиса, дермы и гиподермы, как долгое время считалось, – в подкожной ткани множество микро-впадин, в каждой из которых поддерживается постоянство среды и свойств. На основании этих данных изобретатель Джафранко Туццо разработал и внедрил новый принцип воздействия на соединительную ткань. Метод получил название M.M.A.S. (мультимикроразрывная стимуляция) и лег в основу работы аппарата icoone. Сегодня такие аппараты позволяют не только моделировать фигуру, но и менять качество кожи. Последняя версия, icoone LASER MED, работает как с внешней, так и с внутренней стороны тела, так и с зоной вокруг глаз, областью шеи и декольте.

Icoone инициирует ручной массаж, благодаря чему не вызывает дискомфорта, но при этом во много раз эффективнее. Низкоинтенсивный лазер помогает расщеплять подкожный жир, а LED-свет работает с самыми разными проблемами кожи: от потери тонуса до обезвоженности и акне. Еще одно уникальное преимущество аппарата – им можно прорабатывать обе стороны тела одновременно. Рабочую поверхность микростимуляторов

## Puff Piece: Test Driving the Newest Solutions for Keeping Skin Fit and Firm

BY ALISSA BENNETT  
January 13, 2020

As I step into what can best be described as a sheer skin suit, Zahn walks me through the **ICOONE**, a futuristic depuffing device with a pair of oscillating roller heads that glide over the face and body to gently reduce cellular deposits, relax the nervous system, and enhance blood and lymphatic flow. "There is no main organ in the lymphatic system to keep things moving along, like the heart does for the circulatory system," she explains as the hour-plus-long, totally painless sci-fi massage gets under way. So Zahn and her machine assume that responsibility and optimize it. My abdomen is miraculously flat, my cheekbones newly chiseled, when I peel myself off her jasmine-scented table. I'm hooked on the \$275 treatment and book another six weeks later.

A body-contouring series.

Body whisperer Anna Zahn's cellular stimulation treatments (from \$255; [ricaristudios.com](http://ricaristudios.com)) using a futuristic **icoone medical** device sourced from Italy have developed a cult following on both coasts (she opened a pop-up location in a Soho showroom in New York this fall) for their dramatic, body-smoothing and slimming effects. A post-travel and pre-event beauty boon.
